The document contains safety guidelines for work in closed spaces. It includes checklists for required safety measures:

- Confirming that the workers are authorized to perform work in enclosed spaces.
- Ensuring the work area is free from hazardous materials.
- Verifying the lead has access to the closed compartment.
- Confirming that all moving parts are disconnected from the power source.
- Ensuring there is a natural or forced ventilation system in place.
- Checking for oxygen content using an oxygen meter.
- Using protective equipment such as personal protective equipment (footwear, helmet, safety glasses).
- Ensuring there is adequate lighting with approved protective lighting.
- Connecting a safety line.
- Having suitable escape equipment available.

The document also includes a section for issuing work permits, with fields for the issuer, the date of issue, and the date of expiration.

### Table: Safety Measures

<table>
<thead>
<tr>
<th>Measure</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>O2</td>
<td>% 23.5 - 19.5</td>
</tr>
<tr>
<td>LEL</td>
<td>% LEL &lt; 10</td>
</tr>
<tr>
<td>CO</td>
<td>20 - 20 ppm</td>
</tr>
<tr>
<td>H2S</td>
<td>5 - 20 ppm</td>
</tr>
</tbody>
</table>

The document concludes with a section for signatures and approvals, including the issuer's signature, date, and additional remarks.
In the event of an emergency, the following steps must be taken:

Check List is filled out properly and the place of work is done in the specified place and date.

Before starting work, check the Check List located on the left side.

The Check List must be completed by the person in charge, the manager of the work, the manager of the safety department, and the person conducting the work.

After completing the work, ensure that all doors are closed and all tools are removed.

At the completion of the work, place the approval in the safety department.

Copies: Person in charge/manger, Safety Department, and the awarded area.
